eServices – eReferral in Champlain Region

Overview of eServices Program – eReferral

The Ontario eServices Program encompasses digital services which support clinical workflows, including eReferral and eConsult services.

eReferral enhances communication between primary care providers and specialists/organizations by enabling quick, complete, and secure referrals to be initiated/managed directly from compatible EMRs (Telus-PS, OSCAR-WELL Health, QHR-Accuro).

Working closely with provincial Ontario eServices Program partners to drive an integrated end-to-end electronic referral strategy, and supported by funding from Ministry of Health, OH-East eReferral deployment team supports health care providers in our region to easily implement and use this solution at no charge. The local team is at your disposal to assist with any questions pertaining to adoption and utilization activities (and is equipped with comprehensive tools for remote/virtual sessions).

Benefits

If your clinic is using Telus PS, Accuro, or OSCAR (OSP WELL Health), eReferral solution integrates with your EMR, allowing you to initiate referrals directly from a patient's chart. Key features include:

- Easy launch of referrals with auto-populated information of both patient and sender
- Immediate confirmation of the referral being received.
- Referral information is downloaded automatically into the patient's chart.
- A simple, secure two-way communication between sender and receiver.
- Notifications of referral status change can be set up in your EMR & via email to ensure your providers and supporting staff will be notified of the next steps for the referral.
- If the patient's email is included in the referral (patient's consent given), they can also benefit from the easy notification features available, such as confirmation that referral has been initiated, as well as information from the receiving site (such as appointment details, pre-visit information, etc.)

Onboarded Clinics

As of July 1, 2026, a total of **2,772** MDs and NPs in the **Champlain** sub-region have been onboarded and have actively sent eReferrals. The number of available referral destinations continues to grow, with **423** listings having received eReferrals. Since the launch of eReferral in **Champlain** in 2018, over **681,000** referrals have been processed - **90%** of which were submitted electronically.

Contact Us

If you have any questions with regards to eReferral or require further information and support, please contact us at: contact@ereferralontarioeast.ca

For a comprehensive list, you can also visit our website: <https://www.ereferralontarioeast.ca/destinations>
